

Cloud Migration

Results achieved

Objectives	Actions	Results
Leveraging antiquated legacy systems and reducing overall spend on hardware upgrades and software licensing updates was the key driver for change. Cloud migration and the roadmap to navigate to a full cloud environment was the objective. Restoring faith in backup, disaster recovery, and downtime risk mitigation was also a key driver.	<ul style="list-style-type: none">▪ Sell the companies car financial services in an expeditious fashion, creating seamless transition from 2010 exchange environment to Office 365▪ Data break apart and loss prevention was would be difficult to break apart. Implemented POC (Proof of Concept) to migrate change over with zero downtime and seamless migration.	<ul style="list-style-type: none">▪ Migrated 200 users to Office 365▪ Proof of concept provided seamless transition from legacy to cloud migration▪ Back up and recovery in data break and loss prevention executed with zero errors▪ Removed all requirements for on premises Atlanticus exchange environment and moved all authentication and configurations to Atlanticus and all subsidiaries owned devices.

Atlanticus Holdings Corporation is a financial holding company with investments primarily in companies focused on providing financial services.
