

# Cloud Migration

## Results achieved

Objectives	Actions	Results
<p>The primary concern was converting the legacy Lotus Notes operating systems into a more robust cloud migration strategy for the enterprise as a whole. Ultimately Office 365 was the selected system. The objective was to restore efficiency, security, and a holistic cloud migration resource, improve customer service and enable the medical products manufacturer to achieve its growth ambitions.</p>	<ul style="list-style-type: none"><li>▪ Leveraged migrationwiz off legacy environment</li><li>▪ Created a new Office 365 Operating System designed to not only improve IT processes and business continuity, but also improve the employee and customer experience. This included a sales activity tracking system, a meeting rhythm and operating report to raise visibility of all sales activities, performance measures to monitor progress and an escalation process to resolve issues quickly.</li><li>▪ To embed the simplified process and new management tools, making the IT infrastructure easier to support.</li></ul>	<ul style="list-style-type: none"><li>▪ Migrated 2,400 mailboxes and desktops</li><li>▪ Local archives 1,300</li><li>▪ Utilized 10 resources reducing.....</li><li>▪ Employee performance rose because communication and coordination improved between departments, and employees felt more accountable for meeting daily performance numbers.</li><li>▪ Removed and reduced overall lotus licensing costs</li><li>▪ Capital costs allocation reduced 30%, resulting in less on prim servers and hardware</li><li>▪ Increased computing capacity for employees</li><li>▪ Increased security and network optimization</li></ul>
