Virtualization Services

Offering Overview

SA IT, a leader in business IT virtualization works with companies from small to enterprise level. SA IT provides IT virtualization via our W-2 badged Solution Architects. IT virtualization of mission critical services, such as email and CRM to cloud platforms, create a flexible environment for your employees to access mission critical data from anywhere, anytime. Our proprietary SMrT MOVr software allows for all aspects of data and application migration to be performed securely, expediently, and efficiently around the clock, reducing network and user disruption.

Features

- Network optimization via industry best practices for IT virtualization
- In-developed IT virtualization migration tools assisting with P2V, V2P, or V2V migrations
- Team includes certified experts in the latest IT virtualization and storage technologies
- Flexible work environment (integration of emerging technology with ease of use)
- Automated backup of critical data and immediate application support

Benefits

- Multi-platform expertise include VMware, and Microsoft Hyper-V
- Plan and deploy disaster recovery options around mission critical applications
- Server and storage optimization
- Strategic planning of current and future initiatives

Why SA IT Services?

SA IT Services, the leader in IT services, possesses over 25 years of experience and understands business's need for scalability and flexible solutions provided by reliable and trustworthy staff. This is why SA IT leads the industry by providing clients with full time W-2 badged and certified employees. Our team, of over 400 dedicated IT professionals provides responsive support services anywhere nationwide.

We possess the expertise of Certified Six Sigma Black Belts, CCNAs, CCIEs, and Microsoft professionals. SA IT, Solution Architects analyze the current environment for our clients and we develop solutions which optimize their IT investment to generate higher operating capabilities at economical costs. Whether that means new hardware and software or new network architecture, our service professionals ensure the highest service levels at any price range. SA IT can handle sudden issues without causing delays for our customers. Having these failover capabilities within your company prevents service outages and downtime.

We pride ourselves in strong customer relationships and excellent service. Whether it is implementing network optimization, technology upgrade, or managed print services into your company or providing day-to-day customized IT solutions with specialized technical support, at SA IT we are your partner and not just your service provider.
